INTERNATIONAL PUBLIC DEVELOPMENT ACADEMY

To the Candidate for president of Germany (Bundespräsident) Mr. Joachim Gauck

Dear Mr. Joachim Gauck,

Why to You?

The reason we appeal to YOU I can explain by our quite intimate history, starting with the war years.

We have every reason to believe that, as in every one of us from the SOVIET union and the GDR had been the spirit of social priorities - in spite of the great drama of the story. You are certainly not alien to social motives and deeply understand the social problems of not only the German people and not only on the topic of social benefits of pensioners, employment, care of patients and so on - but in the most general sense: as the improvement of the quality of life and security of all.

Obviously, to you, as the president of the country, these tasks will be the main.

I have got some information about you from the Internet. I think we both understand the possibility and necessity for the movement to the socialization and humanization of society: it is a reduction of amotivational aggression and unity of the human community for its further joint moral evolution. By the way, you will surely agree that Ethics and Morality - that is, ultimately, just freedom from harming each other.

On the subject of conversation

The subject of our conversation is how to build mechanisms of continual reduction of human drawbacks and increase the moral comfort of our life. As far as I understand, this are just the main questions of the president of Germany.

Among the first, in our opinion, should be the question of the reorganization of our justice, the organization of a society's response to anti-social acts of any person. This question is among the most difficult but also the most necessary and important. The last decade of our research in the field of different systems of justice made us convinced that of public court should be organized on the basis of introduction of unconditional and inevitable compensation of damages. This court should be organized by the gradual evolution of the principles of justice from the primitive codified legislation to adequate justice on the basis of the compensation of the damage, all of its types: economic, material, social, ecological, moral... It's all that we have worked out for the past 35-40 years, we learned to measure in a value form. These principles can and should be applied, starting with the millions of domestic cases and further to national and international issues, and for the successful inter-ethnic and international society on Earth, and to prevent the wars, and for the concentration of our efforts to confront the more frequent natural disasters.

But the ban damage must be installed and by ourself, by our body. It should concern Including at the expense of damaging the image of life, beginning with irrational power. Also rationalization schemes of diet and lifestyle according to the criteria of a minimal wear and tear the body - the real challenge of the day.

Among the many challenges, in our opinion, now the most important need is not just a discussion, but the conviction of the public of the necessity of application of ways of power, aimed at minimal wear and tear of the body and slowing the death of neurons. And even the use of SPECIAL means of their growth through targeted exercises in knowledge and creativity. Otherwise, continue the tendency of the conservative behaviour, to reduce the immunity and the weak opposition diseases from naturally accumulated in us defects - and so to a great age, multiplying its usefulness for the society, reaching honored longevity - instead of absolutely counterproductive idea of the struggle for universal

immortality. People are able and shall become with age stronger because of the growth of wisdom and not to be afraid of aging of the nation, be afraid of helplessness. And we are actively seeking, looking for people, leaders who understand it first of all.

It is quite possible that the Germans will soon be able to become proficient in creating not only a brilliant technical projects, starting with the Ruhr, the V-2, mp3, but also to learn and revive the system of creation and implementation of social and generally socially useful projects. It seems to us, that the greatest project of the DECISION OF THE EUROPEAN PARLIAMENT AND OF THE COUNCIL concerning the European Year of Creativity and Innovation (2009) - this project is not only from Brussels, but also from Berlin. And our current offers from us to you as the future president, including with respect to the vector of these started in Europe transformations. Including - gradual and declination of the German people to feeling the absorption of the ideas of the importance of self-development and priority training techniques of creativity, as this requires a "DECISION". Our last project - it is the system «novation» training, has recently written and published a textbook of creativity (if you are interested in our concept, see our website <http://talant-abc.narod.ru> p. 6.33).

In establishing our contacts, we with pleasure will pass the Germans all our completely enough developed projects - of course, not for the immediate recognition and implementation, but in order to discuss between our specialists, then the serious Internet forums, and then for the implementation. With TV, Internet, in my opinion, is the best way to interest the population. It would be good to establish a regular programme - may be, it is in your power.

We immediately noticed and supported the belgian draft of the new type of democracy G1000 and are searching for the ways of its development in Russia.

But most importantly, we, together with your specialists for a year or two can create - develop and try to where you can introduce German, and then pan-european framework of social development - the creation and implementation of social projects. Germany will do this not only for myself. Today it is a country of the most intelligent and the most rich, then it will be the best, it may be better to Austria, where, as we all know, today is leaving a lot of Germans. Such a life - and even better! - you can make at home. "But not only for themselves! Germany will become the centre of dissemination of social creativity in all countries, and not only in the EU. Her former 3 attempts to establish world domination Germany will be able to neutralize the successful public social project. Many internally brought up the positive characteristics of the German people, ranging from a sense of duty, a clear order and responsibility for the work already begun, you can be sure that the task offered to you will be executed perfectly. May be, this will be the fulfillment of the expectations not only of humanity, but perhaps some of the higher forces, yet we did not open.

But we all know what Zu gut ist schlecht or: Gut ist besser als perfekt. So your negative response or complete refusal we shall receive without satisfaction, but with understanding.

About myself and about us

We are a small team of International Public development Academy. We are not science fiction. To engage in futile fiction, we have in Russia now there are a lot of opportunities. For example, recently - February 19, ended with the international congress of GF2045, which is on the money organized by our young millionaire in accordance with his dream of youth to make everybody immortal. And its resolution seriously invites the United Nations to adopt such a program. Although almost all of the guest americans, who are much older than our millionaire, plus some of our wise scientists insistently offered to draw attention to the main thing - on the need for social programs, to our grandchildren who could live in a safer world and in the year 2045 have something to eat.

We are now preparing an appeal to the americans, who were invited to Moscow for the congress GF2045 and which clearly did not agree with its resolution, the proposal on the establishment of the so far virtual movement GR2045, "global responsibility", and sure, that many of this idea support in Europe and Germany - may be, implemented with its new president.

In the life of the germans I had a lot of intersections. In time of war (1942) us with my mother military germans saved from death. From this time on, if I had a chance, I listened to the German language and when I could, visited Germany - first socialist, and then and the capitalist. However, in recent years I have met different Germans, including nerve, and evil... - something has an effect on you, some kind of not a positive force.

We are the developers of these already long-established concepts, like Synergy, Social ecology, the Alphabet and Grammar of the measure of creativity, the court of Public opinion - and everywhere on a new basis and only with a solid quantitative calculation. We are also the authors of such, perhaps, understandable terms and concepts, as Novistics, Sociomics, Creasphere.

In this year in accordance with my work on the issues of justice I received an invitation in the Hague (ICC), but the French language for me is completely closed.

Our materials long ago given over to the Russian parliament (Duma), but there they think slowly and for a long time. This is the tradition and mentality, and the harsh necessity. Of course, the introduction of social development in Germany will very soon become known in Russia, then our people will be easier for her to accept. We need it.

For a while we work only on the books, which are focused on social projects - if you are interested, please, refer to our website <http://talant-abc.narod.ru> the main thing - pp. 15 and 16. Recently, our books were published by a small but as we believe - very promising German publisher LAP in Saarbrücken - in an abridged version of the lyrics on our site p.p. 6.37 and 15.4, including the textbook NOVISTIKA item. 6.16. The following book is being prepared in English and partly in German language is the sum of the contract and independent translations for the past few years. On the proposed to us system of education in the German language - on the site of the item. 6.29 and 6.33; very briefly, see below.

To speed up the development of society, it would be necessary to start, of course, with the reorganization of the office of science. As the americans say, manage - means correctly to stimulate. And we have consistently develop the idea that besides the usual thesis naturally, there, where it is possible and necessary, not touching the humanitarian sphere, is very much needed assessment of the scientific achievements of the largest social effect, with the authors of various creative degrees. But we do not reject and policy as a tool for development: we are preparing materials to create our Russian Party of public development.

About this letter. We are not sure that you will soon find and be given this letter. Therefore, we try to take advantage of the several channels, including our acquaintances of the Germans. We ask all apologize for any concern. Including for the English language: write a letter in your native language, we don't run the risk.

If you have something from the fact that the us here affected, and are interested in the above mentioned subject for possible joint activities or discussions, I or we are ready to come to Germany and may be meet you. Or to indicate on our site the corresponding points and if necessary, to send additional explanations. We now have steadily running an e-mail (preferably in parallel on two addresses: av122356@comtv.ru, av122356@gmail.com).

Why now?

TO YOU I don't accidentally turn much earlier, than it would be by the way - with the opportunity to congratulate You with the coming into office of the president: unfortunately, in such cases, the management very often becomes inaccessible and the main thing - not interested. However, we do not know, whether this rule you have in Germany. But! You, as it turned out, are a person of high moral level and in any case we will be happy to cooperate with You.

Excuse, please, translation was executed by computer - we hope with an accuracy of up to a meaning. Translation into your native german language would have been too risky.

With the best regards, Boris A. Minin

President of the International Public Development Academy,
Chief of the Federal Centre of certification,
Doctor of engineering, Full doctor of economics, professor,
Academician of the International Academy of informatization (UN)

Die Anlage abgekürzt:

... Unsere Akademie hat ein Lehrbuch „Novistik“

...Erlauben Sie mir, Ihnen einige unsere Entwicklungen zur Verbesserung der kreativen Kinderbildung und gleichzeitig das notwendige Angebot für die schnelle Realisierung des Beschlusses des Europäischen Parlaments und des Rats bezüglich des Europäischen Jahres der Kreativität und Innovation 2009 vorzustellen.

Es handelt sich um ein Angebot bezüglich der gemeinsamen Ausarbeitung des Bildungsprogramms unserer Akademie „*International Public Development Academy*“ (<http://talant-abc.narod.ru>) für Kinder der Oberstufe. Das Ziel des Bildungsprogramms ist, den Kindern die Erkennung des Seins beizubringen, die Fähigkeit, Mängel in ihrer Umwelt erkennen und effektiv korrigieren zu können, zu fördern, um Erfindungen und Vervollkommnungen zu ermöglichen. Unsere Akademie hat ein Lehrbuch „Novistik“ (in russischer Sprache) ausgearbeitet und herausgegeben. Es umfasst viele nützliche Informationen aus der Theorie der Kreativität. Die Akademie beschäftigt sich mit dem Thema seit 1973-75. Das Programm und Lehrbuch in abgekürzter Form finden Sie auf der Website unter den Punkten 6.6 / 6.23en,... 6.16 / 6.17en.

Man muss nur vorstellen, dass die Welt sich vorwärts bewegt. Nach der Entwicklung in den letzten 150 bis 200 Jahren der NOOSPHERE beginnt die Entwicklungsepoche der KREASPHÄRE, welche als nächstes Stadium der Entwicklung der Bio- und Noosphäre der Erde bezeichnet werden kann. Zum bedeutendsten Faktor in diesem Stadium, wird zielgerichtete und zweckmäßige Funktion des Menschen - der antientropische Menschheitsentwicklung seiner äußeren und inneren Umwelt. Die Bildung darf von diesen Prozessen nicht fernbleiben.

Wir sind fest überzeugt, dass die Menschen, die diesen Kurs von der Kindheit festlegten, WERDEN PRODUKTIVST AUF DER ARBEIT; SIE WIRD DIE NEUEN ARBEITSPLÄTZE SCHAFFEN - AUF DEN KONKURRIERENDEN MARKTPRINZIPIEN, ABER MIT DEM NÜTZLICHSTEN ÖFFENTLICHEN PRODUKT; sie werden nicht gegen, aber für die Verlängerung des Renternalters protestieren. Und auf die Renten werden für die Familie und die Gesellschaft die nützlichen, gesunden und lebenslustigen Menschen.

Unsere Akademie ist ständig bemüht die europäischen Fortschritte auf dem Gebiet der kreativen Bildung zu verfolgen. Aber noch entspricht ihr realer Stand nicht den Kriterien des Europäischen Parlaments. Auf diesem Gebiet haben wir einen Vorsprung, weil unsere Akademie Materialien nutzt, welche wir Schritt für Schritt von 1973-75 ausgearbeitet haben, als noch keiner in Russland oder in Europa sich mit der Kreativität ernst beschäftigt hat. Wir konnten irgendwann daran zweifeln, ob den richtigen Weg eingeschlagen haben und ob diese Richtung überhaupt irgendwann benötigt wird. Genau aus diesem Grund hat der Beschluss des Europaparlaments bezüglich der Kreativität und Innovation uns eine große Freude bereitet. Und wir sind bereit unsere Errungenschaften mit den Europäern zu teilen. Wir würden es bedauern, wenn solch eine großzügige allgemeinmenschliche Aufgabe negativ beurteilt werden würde.

...wir die Richtung bereits vor 30-35 Jahren vorausgesehen und praktisch allein eingeschlagen haben und deswegen mit großer Genugtuung das bedeutsame Dokument „**Decision of the European Parliament and the Council concerning the European Year of Creativity and Innovation (2009)** – Commission of the European Communities. Brüssel 28.03.2008“ betrachtet haben. Seine Konzeption entspricht sehr der Richtung, an die wir seit Jahrzehnten festhalten, leider praktisch allein. Und weil die wissenschaftliche Führung unseres Landes noch keinen direkten Sinn in der Realisierung dieser Methode erkennt, sind wir bereit die Ergebnisse unserer Forschung mit Ihren Spezialisten zu teilen.

...eshalb sind uns die Dokumente sehr klar, die wir analysierten. In den Unterlagen der stattgefundenen Konferenz in der Stadt Linz wurde folgendes vollkommen richtig festgehalten: um die Begeisterung zu wecken, darf man sich „**nicht in rein kognitivem Lernen erschöpfen**“. Außerdem behauptet eine andere Gruppe, dass

der „**Weg zu Europa übers Herz führt**“. Aber auch „**Learning bei doing**“ zeigt das, was als der bedeutendste Beitrag bewertet wurde, nochmals: Um die Begeisterung zu wecken, darf man sich „**nicht in rein kognitivem Lernen erschöpfen**“. Dies muss Europa „**so früh wie möglich**“ erkennen. Dem kann ich absolut zustimmen.

Aber dies ist vollkommen zufriedenstellend. Wir fügen hinzu: Der Überschuss am Material unterdrückt das Auffassungsvermögen und dämpft die Initiative. Das *obligatorische* Material soll in seinem Umfang um 2-3 Male verringert werden. Es soll bildlich mit der Erklärung, wie es erfunden wurde und zustande kam und mit Beispielen aus dem täglichen Leben vermittelt werden. Letztendlich sollten wir darauf verzichten, den Kindern das Wissen einzutrichern und von ihnen zu verlangen, sich all das zu merken, als gelte es für immer und ewig. So machen wir aus ihnen vollendete Konservative, die zum Auffassen vom Neuen nicht fähig werden.

Es ist nicht schwierig zu begreifen, dass es in der Praxis vieles bewirken wird: „**Lebendig lernen**, produktive und sicherste Nutzung der empfindlichsten *Zeit* - Kindesalters.

Apropos, auf der Konferenz in Linz wurde klar die Meinung geäußert, dass die EU viel Geld in Projekte investiert, von denen kein Nutzen erfolgt (*Bezüglich EU-Projekten wurde der hohe Aufwand angemerkt, der dann noch keine Garantien für eine Genehmigung bietet*). Methoden, die in unserem Lehrbuch stehen, soweit sie bereits im Schulalter behandelt werden, werden das Gegenteil beweisen. Sie können und müssen bereits in der Schule behandelt werden.

Wir hoffen, die Übersetzung war gemacht mit der Genauigkeit bis zum Sinn
